

Task Force Interoperable Citiverse, update

Bart De Lathouwer, Gert Hilgers

Task Force Interoperable Citiverse

Where are we?

“Easy” to work on the technical interoperability, harder to work on the others.

Interoperability is the driver for market adoption, where everyone can play.

5 interoperability elements

Cultural interoperability

Legal interoperability

Organisational interoperability

Semantic interoperability

Technical interoperability

Task Force Interoperable Citiverse

Where are we?

How do we incorporate the societal change, brought by the 'new' digital reality – where the social, physical and digital realities play on equal footing.

5 interoperability elements

Cultural interoperability

Legal interoperability

Organisational interoperability

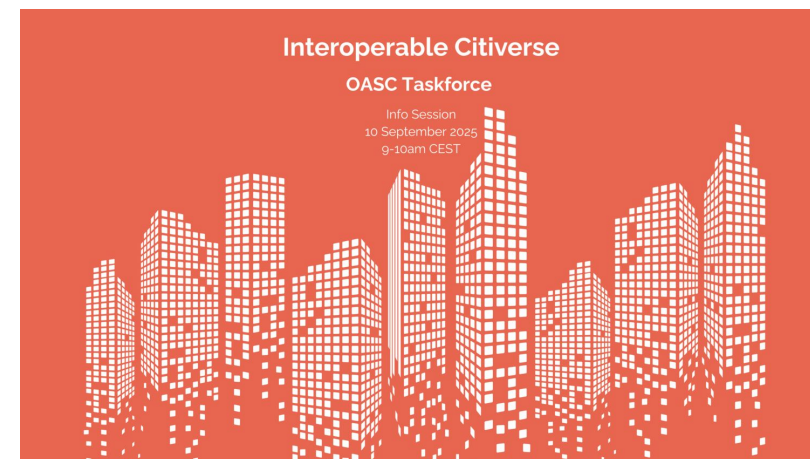

Semantic interoperability

Technical interoperability

Upcoming merge the Activities from the OASC Task Force on the Interoperable Citiverse with Track 16 'Interoperable Citiverse' of the UN/ITU's Global Initiative on Virtual Worlds and AI

Similar activities, so better to unite efforts

Global Initiative on Virtual Worlds and AI

Discovering the Citiverse

Upcoming merge the Activities from the OASC Task Force on the Interoperable Citiverse with Track 16 'Interoperable Citiverse' of the UN/ITU's Global Initiative on Virtual Worlds and AI

Similar activities, so better to unite efforts.

Call to action: join us, wider (geographical) scope

Interoperability does not happen by accident; it's a result of a concerted effort!
